

CLARA SLYS

FullStack Developer

EXPERIENCE AND PROJECTS

Freelance FullStack Developer

Côte d'Or, Haute-Savoie, Yonne, since May 5, 2025

- Design, development, and refactoring of web applications for multiple companies and independent clients, across projects with diverse business requirements.
 - Full-Stack Project – Business Chatbot (MarineOpsAI)
 - Front-end redesign, bug fixing, and implementation of new features: document management, folder hierarchy, UX improvements, and stabilization of the existing application.
 - Front-End Redesign of an Institutional Website (marches-publics.com)
 - Complete redesign of the user interface using **Angular** and **Tailwind CSS**, improving usability, performance, and code maintainability.
 - Career Assessment SaaS Platform (Jurni)
 - Front-end development of a business application: **Next.js** interfaces, interactive quizzes, personalized dashboards with data visualization, state management, caching, animations, and responsive design.
 - Back-end interventions (**Python**, **FastAPI**).
 - Showcase Website for an Artisan Upholsterer
 - UI/UX design and development of a showcase website using **Next.js**, including a contact form, **SEO** optimization, and client support through deployment.
 - Dynamic Form Editor
 - Development of a solution enabling the creation of customizable forms exportable via iframe.
 - Design of dynamic user interfaces, implementation of user authentication (OAuth), collaboration with a UX designer and another developer, and project tracking using **Notion**.

FullStack Developer (AnthroPi)

Dijon, April 2023 - April 2025 (work-study program)

- Development and improvement of a call simulator and back office (**Angular** + **Node.js**): addition of front-end and back-end features, UI improvement, dynamic PDFs generation, database management (**MariaDB**), bug fixes, unit testing.
- Internationalization management with **MongoDB**.
- Maintenance, security, and evolution of REST APIs, middleware, route security.
- Working with the **Scrum** method (sprints, dailies, reviews), task management via **Asana**, bug tracking via **GitLab**, working independently, occasional collaboration.

- Node.JS / JavaScript / TypeScript
- Java
- Python
- HTML / CSS / SASS
- Linux / Windows

Frameworks / libraries:

- Angular / React / React Native / Next.JS
- Express.js
- Spring Boot
- FastAPI
- Bootstrap, Tailwind

Tests:

- Jasmine / Karma (Angular)
- JUnit / Mockito / Spring Boot Test / AssertJ (Java)

DB / architecture:

- PostgreSQL / MongoDB / MySQL / MariaDB
- Prisma ORM
- MVC
- Microservices

Tools:

- Git / GitHub / GitLab
- Docker
- Visual Studio Code / IntelliJ / Eclipse
- Figma / Whimsical
- Asana / Notion

SOFTSKILLS

- Collaboration & kindness
- Critical thinking & curiosity
- Independence & adaptability
- Service orientation
